POWER. PERFORMANCE. PRECISION.

With power, driving pleasure and fuel economy, a selection of engines are available to complement your style. Choose from our new Plug-in Hybrid (PHEV), 3-cylinder Petrol, 4-cylinder Petrol, or our 4-cylinder Diesel - fitted with Mild Hybrid (MHEV) technology. This advanced system turns the engine off during low-speed deceleration and harvests kinetic energy to help charge the battery. Such a combination maximises efficiencies, especially during urban driving.

ALL-WHEEL, ALL-WEATHER.

E-PACE's All Wheel Drive (AWD*) system combines the agility and character of Rear Wheel Drive (RWD) with the added security and traction of AWD. When road conditions become more challenging, the system subtly channels power for optimum traction and more comfortable progress. Then, Jaguar's Intelligent Driveline Dynamics (IDD) sets in. Using sensors measuring throttle and steering inputs to anticipate wheel slip, IDD seamlessly coordinates these inputs to distribute torque accordingly. Plus, the all-new Adaptive Surface Response (AdSR*) system works at all speeds, monitoring the car's environment and adjusting engine and brake settings to maximise grip across most surfaces.
